EMBRACING

DIGITAL COLLABOARTOIN

1. Be intentional with our digital collaboration goals, what the student process will look like, and how we will assess student learning

2. Begin with user-friendly options like Kidblog.com and Padlet.com

3. Pose specific questions to assess students' previous knowledge of content

4. Students can thoughtfully reply to 2-3 of their peers' responses

5. Student replies can involve asking a question, adding more information, and/or making a connection

6. Model to students how to thoughtfully and respectfully reply to peers
